RE: Docket No. 07-16

Dear Madam Secretary:

I support the M2Z proposal because fast, free broadband would be a benefit to people wanting to take an active role in their healthcare. According to MedMarket Diligence, there are approximately 169 million telemedicine care visits between patient and physician each year.

Right now, many of my patients are able to research new medical procedures and learn more about the medications they are taking on-line. Important medical information is just a mouse click away if you have Internet service.

However, being an informed patient should not be a privilege, it is a necessity- just like healthcare. Affordable broadband would allow ALL Americans to compare physicians, check insurance information and learn more about whatever medical conditions they may be experiencing.

I urge you to endorse Docket No. 07-16

Sincerely,

A handwritten signature in black ink, appearing to read "Brandon Mang".
